1. The amendment and arguments filed on 12/08/05 have been considered.

Prior arts of record, Rundensteiner et al, "Maintaining Data Warehouses Over Changing Information Sources", in view of Henninger (US Pat. No. 5,499,371), remains the ~~closest~~^{closest} art in searching. TTV

Reasons for Allowance

2. Claims 1, 3-15, 18-31, 33-56, and 58 are allowed.

As per Applicants pointing out (Remarks, filed on 12/18/05, p.17-18):

-The combined system of Rudensteiner and Herminger teaches a method that limits the interaction between an application and a database or data store in a manner where only the application has knowledge and control over the communication process; the conversion process is limited to be unidirectional; the present invention facilitates mapping a markup language document to an object model, or vice versa.

Therefore, the following is an examiner's statement of reasons for allowance: The cited prior arts taken alone or in combination fail to teach claimed invention characterized to bidirectionally map between an object model and markup language document as recited in the manner in the independent Claims 1, 31, 47, 56 and 58.
